Claims 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "transverse traverse", is confusing and unclear, and would be better defined as a transverse member, or the like.

Claims 16-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakane et al and Cziptschirsch.

Nakane et al (fig. 1) discloses a head support having an impact plate 4 that swivels about an axis 3 to provide two-dimensional contact between the head of a passenger and the impact plate during an accident. Cziptschirsch (figs. 1,3) discloses the conventionality of using a transverse element 9 within a seat back for mounting the support posts 1,2, of a headrest. The transverse element includes a base member with upper and lower flanks extending rearwardly therefrom, the flanks having holes therein for the support posts or "connection elements". In view of the above disclosures, to have mounted the swivelling headrest of Nakane et al with a transverse support element such as is taught by Cziptschirsch, so as to provide sliding vertical adjustment therefor, would have been an obvious modification to one of ordinary skill in the art. Alternatively, to have modified the headrest assembly of Cziptschirsch by providing the swiveling head support with an impact plate as suggested by Nakane et al, for a cost efficient means of crash-force

absorption, would have been well within the level of skill in the art, and would have provided structure as claimed.

The precise degree of swivel movement is considered a matter of design choice, as is the contour of the transverse support element.

Note the curved connection elements and the bushing 8 shown by Cziptschirsch.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
